Decatur Public Schools

The first meeting of this committee was held on August 12, 1959. At this meeting, the Advisory Committee recommended the employment of a Project Coordinator.

Following the next meeting of the Advisory Committee on Sept. 16, 1959, the Superintendent of Public Instruction appointed David M. Jackson, Principal of University High School and Associate Professor of Education, University of Illinois as Project Coordinator.

Activities of the Project

Policy Recommendations of the Advisory Committee

At its September meeting, the Advisory Committee made several recommendations for the inauguration of project activities.

1. A stratified program should be encouraged with attention to schools of different sizes, to different levels and to different kinds of school organization.

2. Care should be taken so that study projects do not give the impression that they necessarily set the pattern for future programs that might be established. Flexibility rather than rigidity in planning should be emphasized.
